

Project Objectives

Date	08 November 2022
Team ID	PNT2022TMID38645
Project Name	IoT Based Safety Gadget for Child Safety Monitoring & Notification

By the end of this project, we will:

- Gain knowledge of Watson IoT Platform.
- Connecting IoT devices to the Watson IoT platform and exchanging the sensor data.
- Gain knowledge on Cloudbant DB
- Gain Knowledge of geofence
- Creating a Web Application through which the user interacts with the device

Project Flow:

- The GPS coordinates of the child will be sent to the IBM IoT platform
- Location can be viewed in the Web Application
- A parent can create a geofence in the web application
- The web application will check if the child is inside or outside the geofence
- Notifies the parents if the child goes out of the geofence

To accomplish this, we must complete all the activities and tasks listed below:

- Create and configure IBM Cloud Services
 - Create IBM Watson IoT Platform
 - Create a device & configure the IBM IoT Platform
 - Create Node-RED service
 - Create a database in Cloudbant DB to store location data
- Develop a web Application using Node-RED Service.
 - Develop the web application using Node-RED
 - Integrate the geofence & google map
- Develop a python script to publish the location details to the IBM IoT platform
